

**CONSENT TO PARTICIPATE IN *The Use of Smart Phones to Collect
Transportation-related Behavioural Data***

I understand that I am being asked to participate in a program of research being conducted by Zachary Patterson of the Department of Geography, Planning and Environment of Concordia University.

Zachary Patterson

A. PURPOSE

I have been informed that the purpose of the research is to test the use of smart phones to collect **and analyze** transportation behavioural data from members of the Concordia University community.

B. PROCEDURES

I understand that:

- My participation in this survey will be done through my mobile device.
- I will be asked some questions regarding socio-demographic information about me and my household
- I will be asked to participate in this survey for a maximum of two weeks

- During my participation in this survey, locational information will be collected automatically and then transmitted and recorded securely on a server belonging to Zachary Patterson's research laboratory at Concordia University.
- Locational and demographic information that is collected will only be available to researchers on the project.
- Participants may stop using the app at any time by quitting or deleting the app from their phone, however data submitted to that point will remain on our servers.

C. RISKS AND BENEFITS

I understand that participation in this survey presents no risk to me, but that for every day of data that is uploaded from DataMobile I will have a ballot entered into a draw to win an Apple iPad 2.

D. CONDITIONS OF PARTICIPATION

- I understand that I am free to withdraw my consent and discontinue my participation at anytime by deleting the DataMobile app without negative consequences.
- I understand that my participation in this study is anonymous (i.e., the researcher will not know my identity)
- I understand that results from analysis of this data may be published, but the data themselves will not be published.

If at any time you have questions about the proposed research, please contact the study's Principal Investigator.
